[Differences in cytomegalovirus plasma viral loads measured in allogeneic hematopoietic stem cell transplant recipients using two commercial real-time PCR assays](#)

Gracia-Ahufinger I, Tormo N, Espigado I, Solano C, Urbano-Ispizua A, Clari M A, de la Cruz-Vicente F, Navarro D, Pérez-Romero P
J Clin Virol, 2010, doi:10.1016/j.jcv.2010.03.015

[Analysis of varicella-zoster virus and herpes simplex virus in various clinical samples by the use of different PCR assays.](#)

Finnström N, Bergsten K, Ström H, Sundell T, Martin S, Wutzler P, Sauerbrei A.
J Virol Methods, 2009 May 9, doi:10.1016/j.jviromet.2009.04.035

[Evaluation of an automated extraction system in combination with Affigene® CMV Trender for CMV DNA quantitative determination: Comparison with nested PCR and pp65 antigen test.](#)

Abbate I, Finnström N, Zaniratti, S, Solmone N C, Selvaggini S, Bennici E, Neri S, Brega C, Paterno M, Capobianchi M R.
J Virol Methods. 2008 Jul;151(1):61-5.

[PCR-Based Methods with Aspergillosis as a Model](#)

Duval S M, Donnelly J P, Barnes R, Löffler J.
J Invasive Fungal Infect 2008;2(2):46–51.

[CMV monitoring: the importance of validated flexibility](#)

Finnström N, Sundell T, Jansson B.
Clinical Laboratory International, Feb-March 2007

abstracts

[Quantification of CMV DNA in plasma by real-time PCR for management of allogeneic stem cell transplant recipients](#)

Cardeñoso L, Agudo S, Moreno M J, Rodrigo S, Muñoz O, Rivera V, López-Brea M (Madrid, Spain)
Oral presentation at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2010

[Evaluation of a new commercial real time PCR for detection of Aspergillus spp. in serum and respiratory samples](#)

Hayette M P, Meex C, Boreux R, Huynen P, Melin P, De Mol P (University Hospital of Liege, Belgium)
Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2007

[Monitoring of Epstein-Barr virus DNA in whole-blood samples of paediatric liver transplant recipients](#)

Romero M P, González M P, Frauca E, Jara P, Peña M P, Gutierrez A (Univ. Hospital Salud Carlos, Madrid, Spain)
Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2007

[Evaluation of an automated sample preparation system \(MDX\) in combination with affigene® CMV trender](#)

Finnström N, Sundell T, Jansson B.
Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2007

[A Real-Time PCR assay to detect human cytomegalovirus DNA in whole blood of solid organ transplant patients: optimal threshold for guiding pre-emptive therapy](#)

Lazzarotto T, Vaccari C, Gabrielli L, Monari P, Pop S, Landini M P (University of Bologna, Italy)
Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2006

[Quantitative PCR and Real Time PCR in allogeneic stem cell transplant patients \(SCT\)](#)

L. Cardeñoso, E. Aznar, E. Lomas, P. Sánchez, R. de la Cámara (Hospital de la Princesa, Madrid, Spain)
Presented at the 32nd Annual Meeting of the European Group for Blood and Marrow Transplantation (EBMT) 2006

posters

Analysis of VZV and HSV-1 and -2 in different matrices by affigene kits

Finnström N, Bergsten K, Ström H, Martin S, Sauerbrei A, Wutzler P

Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2008

Comparison between two Real-time PCR methods in respiratory infections from C pneumoniae and M pneumoniae

Shurthi A, Pignanelli S, Delucca F, Savegnago F, Donati M, Cevenini R (University of Bologna, Italy)

In Italian, presented at the XXXVII Congresso Nazionale AMCLI 2008

Detection of herpes viruses in clinical samples: Evaluation of real-time PCR methods

Horefti E, Papadogeorgakis H, Katsambas A, Mentis A (Hellenic Pasteur Institute, "Andreas Syggros" Hospital, Greece)

Presented at the 24th International Union Against Sexually Transmitted Infections (IUSTI) meeting 2008

A semi-automated procedure for monitoring of cytomegalovirus

Finnström N, Törmänen V, Prieto J, Margall N, Rabella N, Jansson B

Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2007

Evaluation of an automated sample preparation system (MDX) in combination with affigene® CMV trender

Finnström N, Sundell T, Jansson B.

Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2007

Epstein-Barr virus in plasma and whole blood

Sester U, Sester M, Gärtner B, Finnström N.

Presented at the 9th Annual Meeting of the European Society for Clinical Virology (ESCV) 2006

Development of a novel and standardised realtime PCR assay for the detection of Aspergillus spp. in immunocompromised patients

Finnström N, Eriksson T, Pisa E.K., Loeffler J.

Presented at the 2nd Advances Against Aspergillosis (AAA) meeting 2006

Correlation of quantitative measurement of BK polyomavirus (BKV) DNA with the clinical course of BKV infection in renal transplant patients

Romero Gómez M P, Jiménez C, Echevarria J E, González Montes M R, Hierro Cuesta S, Peña García P

(Univ. Hospital Salud Carlos, Madrid, Spain, 2006)

Assessment of a realtime PCR Hepatitis B Virus DNA quantitative Assay and comparison with two Commercial Assays

Hormigos K, Alloui C, Belguerma N, Al Hawajri N, Brichler S, Dény P, Gordien E (Avicenne Hospital, France)

Presented at the European Association for the Study of the Liver (EASL) conference 2006

Comparison between two commercial assays for HBV monitoring

Galli S, Meliconi M G, Furlini G (University of Bologna, Italy)

Presented at the European Congress of Clinical Microbiology and Infectious Diseases (ECCMID) 2006

Cytomegalovirus monitoring using two different commercial assays

Sester U, Sester M, Gärtner B, Finnström N.

Presented at the 9th Annual Meeting of the European Society for Clinical Virology (ESCV) 2006

Sensitive quantification of HBV genotypes A-H

Finnström N, Palm S, Nygren M, Hedrum A.

Presented at the European Association for the Study of the Liver (EASL) conference 2005
